

# Medicarp Health

MediCarp Health is a unique product in the market; JPD's showpiece. A high-quality and complete feed that is highly suitable for feeding at low temperatures (down to 6°C) as well. Due to its special composition using enzymes and very high-quality fishmeal, its intake and digestion by koi is extremely good. This plays a major role in the fall, winter and spring; the largest part of the year. Many feed types require a minimum water temperature of 15°C; however few people realise that this period represents only 3 months of the year.

MediCarp contains many ingredients, such as seaweed extract and yeast, which promote resistance. Because koi are most vulnerable at water temperatures between 6 - 15°C, this perfectly matches the excellent digestibility of MediCarp Health at low temperatures.

Yeast also supports the strength and vitality of koi. In addition, MediCarp Health is enriched with astaxanthin, which enhances the koi's lively and characteristic colors.

#### Medicarp Health consists of:

• Raw protein	37,0%	• Raw ashes	7,7%	• Phosphorus	0,9%
• Raw fat	6,0%	• Vitaman E	200 mg/kg	• Calcium	1,4%
• Raw Cellulose	2,1%	• Vitaman C	300 mg/kg	• Natrium	0,3%

# Medicarp Color

MediCarp Color Enhancer is special koi feed composed of high-quality ingredients for maintaining healthy koi and for improving body and colour.

MediCarp Color Enhancer contains astaxanthin to enhance the characteristic colours of koi. The vitamin C in the MediCarp Color Enhancer helps protect the koi's white colour and to sharpen the contrast between the red and the white. In addition, vitamin C promotes a shiny skin.

Furthermore, MediCarp Color Enhancer contains vitamin E which helps reduce stress and supports the koi's vitality and energy.

## Medicarp Color consists of:

- |                 |       |             |           |              |      |
|-----------------|-------|-------------|-----------|--------------|------|
| • Raw protein   | 34,0% | • Raw ashes | 8,4%      | • Phosphorus | 1,2% |
